EDUCATION

Graduate student

September, 2020 -

The Master's Degree Program in Robotics, National Yang Ming Chiao Tung University, the merger of National Chiao Tung University and National Yang Ming University.

Graduate student (temporally leaving)

January, 2020 -

Computer Sciences, National Chengchi University.

Bachelor of Science

September, 2013 - January, 2018

Mathematical Sciences, National Chengchi University.

PUBLICATIONS

Self-Contained Stylization via Steganography for Reverse and Serial Style Transfer

Hung-Yu Chen*, I-Sheng Fang*, Chia-Ming Cheng, Wei-Chen Chiu.

(* indicates equal contribution.)

IEEE Winter Conference on Applications of Computer Vision (WACV), 2020.

[\[Project Page\]](#) Co-First author. Combine neural style transfer and deep steganography, resolve reverse and serial issue of style transfer.

APPOINTMENTS

Enriched Vision Applications Lab

September, 2018 - September, 2019

Research Assistant

Lab of National Chiao Tung University. My advisor is Professor Wei-Chen Chiu.

The First Step of AI and Deep Learning with Python

July, 2018 - September, 2018

Teaching Assistant

The MOOCs of National Chengchi University.

Wrote the cue for video cut and additional tips, solved students' problems by online and offline.

Teacher is Prof. Yen-lung Tsai.

Fire Department, New Taipei City Government

March-June, 2018

Fire Fighting Substitute Military Services

Discharged on June 23rd, 2018.

InQtech Co.,Ltd

September, 2017 - June, 2018

Deep Learning Scientist

InQtech is AI and AIOT startup. Deployed AI in industry.

Researcher of PCB segmentation by GAN project.

Used semi-supervised GAN model to segment part of PCB for robotic assembling.

The First Step of Data Analysis with Python

September, 2017 - January, 2018

Teaching Assistant

The MOOCs of National Chengchi University.

Wrote the cue for video cut and additional tips, solved students' problems by online and offline.

Teacher is Prof. Yen-lung Tsai.

Leopard Mobile

July-September, 2017

intern

Data analysis in CM Security commerce realization team.

Predicted user behavior prediction with deep learning model

NCCU Deep Learning & TWSIAM Student Group

January, 2017-January, 2018

Member

Winning **first** place of study group final presentation in NCCU.

Usually discussion host, especially in GAN.

DiaSEA, South East Asia Language Exchange Platform

2016

Co-Fuonder

Led the team to win the **first place** of the course, The First Step of Startup.

PROJECTS

Reviving Ri-Xing Type Foundry Kai Typeface with GAN

2016-2018

End-to-end process experience from data collation to model building.

Try to repaire and digitalize typeface model with unsupervising deep learning model.

Font Design with Progressive invariant GANs

2017

Honorable Mention of MOST Workshop on Generative Adversarial Networks and GAN Project Competition. Introduced GLCM, a invariant, in progressive growing VAE-GAN to embed font in \mathbb{R}^{300} latent space. Generated new font or glyph by modified the latent space Improved training speed, convergence speed and higher resolution.

Hanzi Typeface Research with Conditional Generative Adversarial Network

2017

Poster of Taiwan Society for Industrial and Applied Mathematics Annual Meeting.

Using autoencoder and conditional GAN to embed font in \mathbb{R}^n latent space.

Advisor: Prof. Yen-Lung Tsai.

Kaggle Quora Question Pairs

2017

Final Project of the course, Web Searching and Mining.

Binary classified question pairs same or differnet.

Comparing 1DCNN, 2DCNN, LSTM model.

#646 Score: 0.17892

Major League Baseball Game Predictor

2017

Final Project of the course, Applications of Mathematics Softwares.

End-to-End process experience. Information graph with 2D CNN.

NCCU x NTUST Hackathon

2015

Built SNS for smallholders and Decentralize agricultural sales.
